FISH & WILDLIFE SERVICE

A PROVISIONAL LIST OF EXPERTS
CONCERNED WITH DISEASES OF
AQUATIC ORGANISMS AND ASSOCIATED PARASITES

Prepared by
FAO Fisheries Division
Biology Branch

**FAO FISHERIES DIVISION
BIOLOGY BRANCH DOCUMENTS**

Three series of documents are issued by the Biology Branch. These are not official FAO publications; they are given a restricted external distribution and this fact should be indicated if they are cited. Most of the documents in these series are prepared as working papers for meetings, or are summaries of information for the use of member governments, organizations, and specialists concerned. The series are:

Special groups of synopses are identified by the following symbols:

CART	Information concerning the living aquatic resources of certain countries and regions.
SAST	Data concerning certain species and fish stocks.
MAST	Methods and subjects synopses.
OT	Oceanography synopses.
IT	Limnological synopses.

Special groups of Technical Papers are identified by the symbols:

RE	Indexed lists of names and addresses of experts and institutions drawn from the Registers of Experts and Institutions maintained by Biology Branch.
CB	The "World List of Periodicals for Aquatic Sciences and Fisheries", Meetings and Activities Sections from, and the Handbooks for, the "Current Bibliography for Aquatic Sciences and Fisheries", special bibliographies and technical papers concerning documentation and bibliographic problems.
MFS	Provisional editions of volumes or sections of "FAO Manuals in Fisheries Science".

Numbers following the symbols are for classifying the document, using the codes of the indexes to the "Current Bibliography for Aquatic Sciences and Fisheries"

Some documents may carry other identification numbers, if, for example, they have been contributed to a meeting for which papers have been marked according to another system; in requesting copies it is sufficient, however, to quote the "FB" number given at the top right-hand corner of the title page.

**DOCUMENTOS DE LA SOUS-DIVISION DE LA BIOLOGIE
DIVISION DES PÊCHES DE LA FAO**

La Sous-Division de la Biologie publie trois séries de documents; ceux-ci ne figurent pas parmi les publications officielles de la FAO, mais font seulement l'objet d'une distribution extérieure restreinte, aussi convient-il de le préciser lorsque ces documents sont cités. Il s'agit le plus souvent de documents de travail préparés pour les réunions, ou de résumés d'information à l'intention des gouvernements des pays membres, ainsi que des organisations et spécialistes intéressés. Ces séries sont les suivantes:

**FAO Fisheries Biology Report
FAO Fisheries Biology Synopsis**

Des catégories spéciales d'études synoptiques sont identifiées à l'aide des symboles suivants:

CART	Renseignements sur les ressources aquatiques vivantes de certains pays et régions.
SAST	Données sur certaines espèces et populations de poissons.
MAST	Etudes synoptiques sur des méthodes et des sujets particuliers.
OT	Etudes océanographiques.
IT	Etudes limnologiques

FAO Fisheries Biology Technical Paper FB/T (No.)

Des catégories spéciales de documents techniques sont identifiées à l'aide des symboles suivants:

RE	Listes indexées des noms et adresses d'experts et institutions tirés des Registres des Experts et des Institutions tenus à jour par la Sous-Division de la Biologie. Le "Répertoire mondial de périodiques concernant les sciences aquatiques et la pêche", les Sections des Réunions et Activités, tirées de la "Current Bibliography for Aquatic Sciences and Fisheries", le manuel de cette bibliographie ainsi que des bibliographies particulières et des articles techniques sur les problèmes de documentation et de bibliographie.
CB	
MFS	Editions provisoires de volumes ou sections des "Manuels FAO de la science des pêches".

Les chiffres qui accompagnent les symboles sont destinés à la classification du document au moyen des codes d'indexation de la "Current Bibliography for Aquatic Sciences and Fisheries".

Il arrive que certains documents portent d'autres numéros d'identification, comme c'est le cas s'ils ont été préparés pour une réunion dont les documents ont été marqués à l'aide d'un autre système; mais lorsque l'on demande des copies de ces documents il suffit de mentionner le numéro "FB" figurant en haut et à droite de la page de couverture.

**DOCUMENTOS DE LA
SUBDIRECCION DE BIOLOGIA
DIRECCION DE PESCA DE LA FAO**

La Subdirección de Biología publica tres series de documentos que no constituyen publicaciones oficiales de la FAO, siendo objeto de distribución externa limitada, circunstancia que debe indicarse, caso de ser citados. La mayoría de los títulos que figuran en dichas series son documentos de trabajo preparados para reuniones o resúmenes de información destinados a los gobiernos de los Estados Miembros, organizaciones y especialistas interesados. Las series son las siguientes:

Los grupos especiales de sinopsis se distinguen con las siguientes siglas:

CART	Información sobre los recursos acuáticos vivos de algunos países y regiones.
SAST	Datos relativos a ciertas especies y poblaciones.
MAST	Sinopsis sobre métodos y materias.
OT	Sinopsis sobre oceanografía.
IT	Sinopsis sobre limnología.

Para distinguir los grupos especiales de documentos técnicos se emplean los símbolos siguientes:

RE	Listas clasificadas de nombres y direcciones de expertos tomados de los Registros de Expertos y de Instituciones que se llevan en la Subdirección de Biología.
CB	La "Lista mundial de publicaciones periódicas referente a las ciencias acuáticas y a la pesca", las Secciones de Reuniones y Actividades de la "Current Bibliography for Aquatic Sciences and Fisheries", el manual para su manejo, bibliografías especiales y los trabajos técnicos sobre problemas de documentación y bibliografía.
MFS	Ediciones provisionales de volúmenes o secciones de los "Manuales FAO de la ciencia de la pesca".

Los números de que van seguidos los símbolos sirven para clasificar el documento, empleándose las claves de los índices de la "Current Bibliography for Aquatic Sciences and Fisheries".

Algunos documentos pueden llevar otros números de identificación si, por ejemplo, son contribuciones a una reunión cuya documentación haya sido marcada con arreglo a otros sistemas. Sin embargo, para solicitar ejemplares basta mencionar el número "FB" que figura en la parte superior derecha de la portada.

FAO FISHERIES BIOLOGY TECHNICAL PAPERS (RE)

This is one of a group of technical papers in which are listed the names and addresses of persons known to FAO to be conducting research on, or interested in, a particular subject within the general field of aquatic sciences and fisheries research. Each list is extracted from the Register of Experts maintained in Fisheries Biology Branch. This Register consists of a set of edge-notched cards based on Information Forms which have been completed and returned by corresponding scientists. Indexes which will be eventually appended to the list will be prepared according to the information entered on the cards, which may be sorted according to place of residence, language facility, subject fields of experience, species group studied and other attributes.

The first version of a list is prepared from names already in the Register of Experts to which are added the authors of documents entered in the Current Bibliography for Aquatic Sciences and Fisheries dealing with the particular subject, as indicated by the Taxonomic and Subject Indexes to that Bibliography.

The first, and each subsequent, version of a list is revised by sending a copy to each person named in it with a request for suggestions for the names of additional persons to whom information forms are subsequently sent.

Entries in the list are numbered serially, and these numbers are used for reference in the indexes, which follow, where possible, the codes used in the Current Bibliography indexes. The names and addresses are set out in such a way that they can be cut out and used for index cards or mail labels. Extra copies of lists can be obtained by application to:
